A Textbook of Surveying Fourth edition by M Shahjahan and ...

Surveying is used in civil engineering for construction site investigation to check levels and distances. Principles and methods of surveying are discussed. Surveying is the process of determining relative positions of different objects on the surface of the earth by measuring horizontal distances between them and preparing a map to any suitable scale.

Principles and Methods of Surveying in Civil Engineering ...

2 • Surveying has to do with the determination of the relative spatial location of points on or near the surface of the earth. • It is the art of measuring horizontal and vertical distances between objects, of measuring angles between lines, of determining the direction of lines, and of establishing points by predetermined angular and linear measurements.

Fundamentals of Surveying
