The book then proceeds to describe operating systems, and the basics of programming concepts like procedure-oriented programming and object-oriented programming. Useful application software like MS Word, MS Excel and MS PowerPoint are described in great detail in separate chapters. A complete section has been devoted to the teaching of data communication, networking and Internet. The book ends with a detailed description of the business applications of computers. KEY FEATURES • Incorporates basics of IT along with developing skills for using various IT tools • Includes diagrams, pictures and screenshots • Provides key terms, review questions, practical exercises, group discussions, project activities and application-based case studies in each chapter • Follows the latest curriculum and guidelines for undergraduate and postgraduate courses of various universities, colleges and institutes

This extensively revised edition is an essential reference for physicians involved in the diagnosis, referral and treatment of the thoracic outlet syndrome (TOS). TOS is made up of a constellation of problems resulting from pathology at the thoracic outlet in the neck. Busy specialty practice sees multiple affected patients in every clinic, but TOS can often be difficult to diagnosis. Thoracic Outlet Syndrome explores all possible ancillary care issues surrounding this complex condition, including rehabilitation, disability, natural history and medicolegal issues, and aims to stimulate research, discussion and a sense of community between professionals involved in this area. Vascular and thoracic surgeons, neurosurgeons, neurologists, psychiatrists and psychologists, physical therapists, occupational medicine specialists and pain specialists will find this book a must read for successful treatment, referral and diagnosis of TOS in clinical practice.

Emission inventory is basic for the understanding of environmental behaviors and potential effects of compounds, however, current inventories are often associated with relatively high uncertainties. One important reason is the lack of emission factors (EFs), especially for the residential solid fuel combustion in developing countries. In the present study, emission factors of a group of pollutants including particulate matter, organic carbon, elemental carbon (sometimes known as black carbon) and polycyclic aromatic hydrocarbons were measured for a variety of residential solid fuels including coal, crop straw, wood, and biomass pellets in rural China. The study provided a large number of emission factors that can be further used in emission estimation. Composition profiles and isomer ratios were investigated and compared so as to be used in source apportionment. In addition, the present study identified and quantified the influence of factors like fuel moisture, volatile matter on emission performance. The publication of the study will be of interest and helpful to the readers in the field of air pollution, human health, fuel saving and energy consumption etc. Guofeng Shen works at the Institute of Atmospheric Sciences, Jiangsu Academy of Environmental Sciences, China.

Do you have unanswered questions about God and the Bible? Have you ever had trouble understanding what the Word says when you read it? If so, Derek Prince has developed an amazing help for you. In

this updated and expanded edition of his Bible study course, you will find answers to questions such as: How can I have victory over sin? What is God's plan for healing our bodies? How can I know I will go to heaven when I die? What is God's plan for prosperity? How can I receive answers to my prayers? What does the future hold for me? Even if you have never read the Bible before, you will find this systematic study guide easy to use and helpful. If you have been a believer for many years, you will find a new ease in conversing with God, enjoying fellowship with other Christians, receiving guidance, and witnessing and winning souls. Through this study, you will experience important changes in your life and discover an intimacy with God that you may have never known before.

This collection of scholarly articles traces the history of book illustration from its first notion in cave art to the early 20th century. It is arranged chronologically with the first section covering the beginning of illustration; the second moves from the illuminated manuscript to the advent of printing; the third and fourth takes the reader from the earliest woodcut illustrations to the beginning of the 20th century; and the final part is concerned with children's books. An annotated bibliography follows which will lead the reader to additional delights and discoveries. The contributors are distinguished art historians as well as well known anthropologists, members of Classics and English departments, librarians, historians, and educators. The contributions have been chosen to cover areas, points, or ideas not generally covered in the basic histories of illustration. Other criteria for inclusion have been the readable style of the author, offering of new insights into the subject, and current reporting on the field. All the articles chosen are in English. Black and white illustrations are provided to support the authors' presentations.

Analyzes both the social and biological evolution of humans, from the spoken language to today's institutions.

Few thinkers can have had a more diverse or a more contested impact on theorizing law than Michel Foucault. This diversity is reflected in the wide range of Foucault's work and of the intellectual fields it has so conspicuously influenced. Such diversity informs the present collection and is signalled in the headings of its four sections: Epistemologies: archaeology, discourse, Orientalism Political philosophy: discipline, governmentality and the genealogy of law Embodiment, difference, sexuality and the law The subject of rights and ethics. Whilst the published work selected for this collection amply accommodates this diversity, it also draws together strands in Foucault's work that coalesce in seemingly conflicting theories of law. Yet the editors are also committed to showing how that very conflict goes to constitute for Foucault an integral and radical theory of law. This theory ranges not just beyond the restrained and diminished conceptions of law usually derived from Foucault, but also beyond the characteristic concern in Jurisprudence and Legal Philosophy to constitute law in its difference and separation from other socio-political forms.

Every six months, 450 fifteen-year-olds are kidnapped from their homes across the world. These kidnappings happen in the span of a week, as reliable as clockwork. The victims don't know each other, or their kidnappers. The fifteen-year-olds either end up with a 'missing persons' file gathering dust in a filing cabinet, or they are assumed dead. No one ever discovers what happens to them. The families move on, forever missing their lost loved one. Unknown to them, their child, grandchild, or sibling, has been taken to the Academy. The Academy, as its members will boast, is the most secretive, powerful organization in the world. The workings of the organization are revealed on a need-to-know basis, and the organization has decided that no one, other than its most trusted members, need to know its true business. Outsiders don't even know it exists. Occasionally, a hunter or hiker will stumble upon the Academy's remote location. They are quickly taken care of. When Asa Palmer, age fifteen, is out running in the woods behind his house, he is taken. Twelve hours later, after being tied and bound, and transported through an underground train station, he finds himself amidst a series of beautifully crafted structures that rest in between a circle of five secluded mountains. He has been chosen as a candidate for the Academy. Each six months, the Academy kidnaps more recruits than they can actually use. For Asa Palmer to live he must undergo body-altering mutations and compete with his cohorts in a series of dangerous and strategy ridden tasks to prove that he is worthy of the Academy's time. This book follows Asa Palmer through his second semester in the Academy. The work is 197,000 words long.
