Quality Assessment in High Schools: Accounts From Teachers, edited by Anne Davies, Sandra Herbst, and Kathy Busick, offers techniques and firsthand strategies for creating systems of assessment that target high school students' needs and engage them in the learning process. Chapters are authored by educators in a variety of disciplines, including English, mathematics, social studies, science, alternative education, world languages, philosophy, and humanities. These educators share practical examples from their own practice to help readers increase the efficacy of their assessment practices and motivate students to take ownership of their learning. This resource is divided into three parts. Part one prepares teachers for learning, teaching, and assessment. Part two shows educators how to engage students using

assessment. Finally, part three prepares educators to evaluate and report assessment.

Essential CISM has been written with a single goal in mind - to present the CISM material in a way that is easy to absorb without leaving any content behind. Plenty of examples are included to drive the points home so that when it comes time to take the CISM exam, you are ready! This exam guide covers all four ISACA domains, including: * Information Security Governance* Information Risk Management* Information Security Program Development and Management* Information Security Incident Management The book is broken down into two sections. Section 1 covers basic concepts you will need to understand before hitting each domain. The CISM official exam guide is overwhelmingly redundant across the domains, and so in this book you will encounter each topic once instead of having to rehash the same subject in different (and chaotic) ways. By the time you start covering the domains, you will already be 60% of the way there! Section 2 presents the four domains and ties together the concepts covered in Section 1, plus subjects that are unique to each domain. Some books provide test questions embedded in the material, but Essential CISM leaves that to the experts to keep the cost down. There are plenty of online resources and tests you can take to test your knowledge that are a much better use of your time.

I am writing this book on the development of special strengths to help raise individual lifts, specifically the snatch and the clean and jerk. The value of the top strength has been forgotten. If strength did not matter, then there would be no need for weight classes. But, indeed, there are weight classes and the weights are always larger in the next higher weight class.

A man miraculously survives a fall from the eighth floor of a drilling rig but is ever after plagued by an unwillingness to live. A preacher loses his ability to speak in tongues and begins to fake it. A young man is intent on suppressing his sinful love for his best friend even though he can think of nothing else. A teenage boy struggles with the temptation of a young girl. A grandmother will stop at nothing to make her grandson famous. These are some of the good citizens of Perser, Oklahoma. And in Aaron Gwyn's debut collection, the people of Perser are unpredictable and unforgettable as they struggle with lapses into sin during the week a young faith healer comes to town. In his careful articulation of faith and doubt, sin and self-delusion, allegiance to the church and self-glorification, Gwyn reveals himself as a writer of great heart and complexity, creating a world that burns with pain, love, and an odd kind of

devotion.
