VelocePress, in close cooperation with Brooklands Books Ltd., has brought this and other repair manuals previously published as part of the Autobooks Owners Workshop Manual Series back into print. The series is an invaluable resource for the classic car enthusiast and a must have for owners interested in performing their own maintenance.

In deciding which models to choose for inclusion in this book selected from Fiat's huge inventory, the author concentrated on three criteria - greatness, size and emotion. Where size is an easy parameter to qualify, greatness is more complicated because it is a combination of both the manufacturer's and the public's opinion. A car that is highly regarded by the public may not have been a commercial success and vice versa. A truly great car is one that works well for both parties. Emotion may be considered to be an element of greatness in that the public's 'love' for a car is a fantastic benefit for a manufacturer and must be treasured. Fiat have made the mistake of 'improving' an icon on several occasions only to find that public opinion went against them. Fortunately Fiat has been magnanimous enough to respond by giving the car buying public more of what it wants. As long as they continue to do so then Fiat's reputation as the world's greatest small car manufacturer is set to continue. The author chose the Topolino as the starting point as the car fulfils all the criteria and it was the first Fiat built in the late 1930s to satisfy the Italian public's new-found desire for mobilisation. The old conventions of car production were turned upside down with the arrival of the 600 which revolutionised car production techniques and maximised on passenger space and performance at minimal cost. These principals continued via a succession of models which include the 500, 850, 126, 127 through to more recent models like the Cinquecento and Seicento. Running in parallel with these 'cheeky' Fiats, this book covers a range of slightly larger cars that were built in huge numbers. Though rather staid in appearance, the 1950s Millecento was family transport for millions of Italians covering three decades, four when the Indian-built cars are included. Similarly the 128, Panda and Uno were 'the' Italian small cars of the '70s, '80s and '90s. Nuova Panda carries the banner to the present day.

Available again after a long absence! Always big on character and charm, Fiat's little cars played an important international roll in providing affordable and practical private transport for millions who had previously thought their dream impossible. With particular emphasis on the now classic 600 and Nuova 500 cars, this book tells the full story of these 'baby' Fiats. Built, and exported to, many countries outside of the marque's native Italy, over 6.5 million Topolinos, 600s and Nuova 500s were sold, and an amazing number survive to this today. Also covered are the wonderful models built on these cars' tiny chassis by Italy's leading coachbuilders, and the motorsport success achieved by the Abarth versions of the little cars that everybody loves.

Hybrid drives and the operation of hybrid vehicles are characteristic of contemporary automotive technology. Together with the electronic driver assistant systems, hybrid technology is of the greatest

importance and both cannot be ignored by today's car drivers. This technical reference book provides the reader with a firsthand comprehensive description of significant components of automotive technology. All texts are complemented by numerous detailed illustrations.

The author brings alive the world of the Royal Mews: the coachmakers, Rolls-Royce and specialists who together support the Royal Household fleet. Nearly a decade of research has gone into the production of this book which contains rare drawings, photographs and other memorabilia.

The Mercedes-Benz W123 was launched in 1976 and sales quickly surpassed those of its predecessor, the W114. The W123 went on to become the most successful Mercedes, selling 2.7 million cars. Mercedes-Benz W123 - The Complete Story explores the life of this highly regarded executive car from its initial evolution, development and production to the creation of new models and its success in motorsport. The book features the styling, engineering and technical advances introduced over the lifetime of the three series; full technical specifications together with customer options, equipment and interior trim for each model; production numbers and vehicle number sequences and finally there is a section on the little-known details of the manufacture of the car in China. It is superbly illustrated with 240 colour and black & white photographs. James Taylor is a professional motoring writer with over thirty years' experience and Mercedes-Benz is one of his favourite car manufacturers.
