"Written by the High Priestess and High Priest of Coven Oldenwilde, this book vividly describes their ten favorite Sabbat rituals, gatherings, and observances. They also teach: how to perform a full ritual in detail; circle etiquette and preparation; how to create an altar and use altar tools; scripts for covens and groups, spellwork, and more"--From back cover.

This title is an introduction to the oracle of the Runes which can be used as a tool for self-counselling. The 25 cards represent the Runes themselves and can be used to guide you on a journey beyond the material to the creative and spiritual.

The Film Developing Cookbook is an up-to-date manual for modern film development techniques. While the original Darkroom Cookbook focused entirely on photographic chemicals and formulae, this book concentrates on films, their characteristics, and the developers each requires for maximum control of the resulting image. The Film Developing Cookbook specifically addresses the difficult subject of T-grain film development. It includes rarely found information on film development and the nature of film developers. The authors take bold and controversial stances on many widely accepted film developing dogmas. They tackle many of the widely accepted "myths" of film development. They reject the trend toward 'scientific evaluation' of films and developers in favor of the photographer developing a personal aesthetic without relying exclusively on densitometry or H&D curves. Steve Anchell is a contributing editor to Outdoor Photographer and PhotoWork magazines. He has written columns, feature articles, and interviews for Camera & Darkroom, View Camera, PIC, Shutterbug, Photo Shopper, and PhotoPro magazines. His previous two books with Focal Press, The Darkroom Cookbook and The Variable Contrast Printing Manual are photography best-sellers. Steve's photographs have been exhibited in galleries and are shown in private collections. He photographs and prints both color and black-and-white with 35mm, 21?4 and large-format cameras. He has conducted over 80 photographic and darkroom workshops since 1979. Steve is currently the program director for the Photographer's Formulary Workshops in Condon, Montana. In early 1998, the first collection of his personal work, entitled The Nude at Big Sur, will be published by Whitefish Editions. Bill Troop is a highly respected independent photochemist.

In Earth Magic, Steven Farmer offers a unique synthesis of ancient spiritual practices and philosophies that have proven over millennia to help heal the spiritual causes of physical and emotional illnesses,

augment personal power, enhance manifestation abilities, and encourage a balanced and harmonious relationship with our Earth. Although the foundation for Earth Magic is universal shamanic wisdom, you don't need to have an interest in shamanism to benefit from its contents, as it expands beyond this topic to incorporate processes that are useful for all those with the sincere intention to heal themselves, others, and our planet.

Published in cooperation with the Radiological and Medical Physics Society of New York (RAMPS), the Therapy Exam has 140 questions. General questions are incorporated into each version. A separate answer booklet for the exam is included which provides explanations for the correct answer. These booklets are a useful advance study guide or practice test for the 2020 ABR Core Exams. The Raphex 2021 Therapy Exam includes topics in IMRT, VMAT, IGRT, SBRT, plus other technologies. Traditional topics in previous exams are still covered. The exam matches ASTRO's current physics curriculum guidelines for resident instruction.

Start your tie-dye adventure with this guide packed with techniques, tips and designs—plus thirty-three awesome projects to get you started! Tie-dye is an adventure every time, with a multitude of effects that make this craft incredibly versatile. With tie-dye it's possible to create a wide variety of designs and patterns to express your creativity—including vibrant stripes, spirals, swirls, speckles, circles, sunbursts, and more. Tie-Dye 101 teaches you all the basic techniques you need to make your own brilliantly-colored designs, using fade-resistant, easy-to-apply cold water dyes.

Bitcoin first appeared in 2009, and it's already challenging everything we've come to accept about money, financial institutions, and even government. The digital currency can be nearly anonymous. And it can be traded internationally—without the fees, government regulation, and bank oversight of paper money. But Bitcoin is still risky. Its value fluctuates wildly. More than \$400 billion of it disappeared overnight with the fall of a single trading exchange. How is that possible? And why is it so popular? CNNMoney reporter Jose Pagliery explains it all. He details the digital currency's mysterious origins. He explores the dark side of Bitcoin: a world of drugs and assassins for hire. And he examines the economic impact of this revolutionary concept through interviews with pensive economists, wary bank regulators, and free market proponents such as Ron Paul. Bitcoin: And the Future of Money explains how it works and why it matters. The book is essential reading for anyone looking to understand a financial innovation that will forever change how we think about money.
