This is a unique and premier book especially written for both undergraduate and postgraduate medical students to help them achieve distinctively in their clinical examinations. The highlighting features include [] clinical photographs [] colour graphics [] flowcharts [] tables [] clinical boxes and [] algorithms which lucidly explain the clinical facts discussed in the text.

The completely revised, thoroughly rewritten and carefully updated edition of a popular book aimed at undergraduate medical students. The limited time-frame available to undergraduate students makes it necessary for them to be able to read a reliable and comprehensive book and this edition fully meets that requirement. The book presents the entire canon of information necessary for undergraduate students in an easy-to-read format which helps them in long-term retention. The theory behind the practice of surgery is covered in a simple manner. The plethora of clinical photographs, colour graphics, flowcharts, tables, key boxes and algorithms explains the facts given in the text which will help even postgraduate students of surgery, as well as practising surgeons. Clinical notes, wisdom lines, most interesting and most common facts are the highlighting features of the manual. Multiple choice questions have been added which will help the students not only in MBBS examinations but also in the postgraduate examinations.

This new edition has been fully revised to provide students with the latest advances and technologies in general surgery. The book begins with a selection of long and short cases, each covering different regions of the anatomy. The remaining sections discuss surgical problems, X-Rays, pathology, preoperative preparations, minor surgical procedures, instruments, operative surgery, and surgical anatomy. The text is highly illustrated with clinical photographs and schematic drawings, and the surgical anatomy section provides hand drawn illustrations correlating anatomy with pathology. The third edition includes several new features including: a long case on the management of diabetic foot, the TNM malignant tumour staging classification has been updated in accordance with the 7th edition American Joint Committee on Cancer (AJCC) manual, interpretation of mammography has been added to the X-Ray section, and lower leg compartments and cervical fascia have been added to the surgical anatomy section. Key points Fully revised, new edition providing students with the latest advances in general surgery Third edition includes many new features such as the updated TNM malignant tumour staging classification Highly illustrated with clinical photographs and schematic drawings Previous edition (9789350906453) published in 2014
